Authorized Distributor
Graco Products
Including the
Matrix Total Fluid Management System

Matrix Total Fluid Management System provides automated tracking and monitoring plus state-of-the-art dispensing for complete control of your fluid inventory. Save time, gain billable hours and maximize your fixed operation's profitability with Matrix.

System components include management software, Transceiver, Matrix Meter, Pump Air Control (PAC) and Tank Level Monitor (TLM). Together, these components wirelessly talk to each other through an RF signal to collect data from fluid dispenses, levels in bulk oil and waste tanks, plus much more!

- >Wireless transmission and reception of meter and tank level information make it simple to track your entire facility's activities
- >Customize to fit your business—three product platforms (Basic, Professional, and Premier) to fit any size facility
- >Multi-level security to protect your assets
- >Precise measurement and control of fluids ensures profits and eliminates out of stock issues for critical inventory
- >CDK Global (formerly ADP), Procede Software, and Reynolds & Reynolds interfaces provide secure, reliable, data transfer between the Matrix database and the dealership management software

FESCO is a Major Installer of Matrix Systems
Call today for a free estimate, and let our experts design a system custom tailored for your shop!

Lubrication-Oil Pumps

Fire-Ball 300 5:1 Universal Oil Pump

The Fire-Ball's legendary reputation for longevity and reliability have made it one to the most commonly used pumps in the industry. A great choice for shops of all sizes. Perfect for Motor and Gear Oil, Hydraulic and Transmission Fluids.

Best Seller!

**Automatic
Drain!**

Stop Ruining Your Pumps!

The two top causes of pump failure are water in your air system, and incorrect air pressure. This compact 2-in-1 Air Regulator/Water Separator is the most economical and effective answer we have found. Regulate air pressure from 2 - 125psi, while removing water with an efficient 40 micron filter, all at a fraction of the cost of a single pump repair. The unit features an automatic moisture drain, easy to read pressure gauge, and locking control knob. The 1/4"npt inlet and outlet fit most pumps and air hoses, and is easily adapted to fit others, while allowing sufficient airflow to power most full sized oil pumps. The compact size and light weight allows mounting directly to the air inlet of your oil pump, or to your stationary air supply.

Double Wall Oil Storage Tanks

ROTH double-wall tanks are designed to offer the highest level of environmental protection. Every inner ROTH tank is made of blow molded, high-density polyethylene that is seamless and absolutely leak-proof and corrosion-resistant. In addition, ROTH tanks feature top connections to ensure the oil stays where it Should. The outer tank is made of leak-proof corrosion resistant steel which is capable of containing at least 110% of the capacity of the inner tank for maximum protection. The outer tank is made of galvanized steel, roll seamed (no welds) with an oil and fire resistant seal, making it one of the safest and most reliable tanks on the market.

Lease To Own Buying Equipment the Easy Way

At FESCO we understand the importance of managing your cash flow. That is why we work with a number of third party creditors to offer you the opportunity to acquire the equipment you need with little initial expense, and easy monthly payments. In fact, many items costing as little as \$1,500.00, can be purchased through one of our convenient lease to own programs. If this plan sounds like something you could use, pick up the phone and give us a call, and let one of our associate creditors work out an easy pay plan for you.

Air Compressors

Atlas Copco GX11 Full Feature Rotary Screw Air Compressor

Atlas Copco has long been recognized as the Technology leader in the Air Compressor industry, and the GX11-FF is rapidly becoming a leader in the Automotive Service industry.

This 15HP unit will deliver over 52CFM at a 100% duty cycle, and do so at an amazingly quiet 71 decibels, making it perfect for indoor installations where noise is a factor. The built in dryer removes moisture from your compressed air, greatly extending the life of your expensive air operated equipment. Efficient Rotary Screw design provides tremendous energy savings over traditional piston compressors, making the GX11-FF far less expensive to own. Includes 80gal tank. Available in 100, 125, 150, 175PSI models. Input power is 208-230/460/3-phase.

Why Should You Make FESCO Your #1 Choice For All Your Equipment Needs?

FESCO is more than just an equipment supplier, more than just a website. FESCO is like having your own, on staff, equipment expert! FESCO is a full service Automotive Service Equipment Dealer with nearly 50 years of experience. Florida Equipment Service, Inc., Was opened in 1967, and rapidly gained an un-matched reputation for providing the best quality equipment and service to the local auto repair industry. Over the decades, we have become experts in all types of equipment used in the auto repair industry, and we have continued to offer services ranging from equipment repair and new equipment sales, to full "turn-key" installations for dealership service centers, fast lubes, independent repair shops, heavy equipment, fleet maintenance, and more. Our customer list includes everyone from local garage owners, to major automotive dealership chains, trucking and heavy equipment specialists, government agencies, and manufacturing.

Over the last few years, the increasing popularity of the Internet has opened FESCO to a much broader market. Our selection of best-brand equipment, and our low prices, made possible by our tremendous buying power, have resulted in requests for our products from customers all over the country, and we now find ourselves shipping equipment to a larger customer base than ever before.

That said, we have resolved to never allow ourselves to become just another website or catalog center. And that, we believe, is what sets us apart. While we can appreciate the convenience of internet purchasing, we also realize that a web site doesn't always have the answers you are looking for. And that's where we come in. Today there is a greater selection of equipment available than ever before. With our long standing relationships with all major manufacturers, we are able to stay on top off the latest changes and technologies. We know what works and what doesn't, we know what will work for your application, and we know how to help you get the most "bang for your buck" I suppose you could scroll through a long list of "FAQ's", or send an email to some stranger and wait for an answer, or call a toll free number, and speak to a "sales Agent," but wouldn't you rather pick up the phone and speak to a real equipment expert. At FESCO our staff are just that. Experienced technicians with decades of experience installing, servicing, and repairing what we sell.

At FESCO we carry only the best products, we stand behind the products we sell, and we have the knowledge to help you choose the right equipment for the job. So visit our website at:

www.gofesco.com

Or better still Pick up the phone and give us a call at:

(800) 488-5816

And put our experience to work for you!

Details/Conditions/Restrictions

- * Price is based on current manufacturer cost and availability at time of publication. FESCO shall endeavor to honor advertised pricing whenever possible, however, due to changes in manufacturer pricing, shipping costs, publication errors, etc, FESCO reserves the right to change pricing at any time, and without notice. Unless otherwise noted, pricing shown shall not include tax or shipping charges.
- ** Shipping/Free Shipping - For the convenience of our customers, FESCO endeavors to offer free shipping when possible, however restrictions by the the carrier may result in additional freight charges. Special circumstances such as rural and on-commercial delivery, over-sized items, lift gate delivery, etc., may incur additional charges per the delivering carrier. Larger items, such as lifts, air compressors, etc., may require the customer to provide a fork lift or other means of unloading from the delivery vehicle. The carrier may or may not contact the customer to make arrangements for delivery. Failed or repeated delivery attempts may incur additional charges from the carrier. FESCO will not be responsible for additional charges resulting from these circumstances. For any questions concerning freight and delivery, please call our office.
